Marlin 2.0.5.3 Settings for I	RIGTREE	SKP 1 /	Turho T	N/C5160 to 4	drive I litim	aker IIM/2	+ 3D Printer				and		
_	ו טוט I I\LL	JKN 1.4_	_i ui bU, I		UITIO OITIIII	akei Uiviz	1 301111110						
Required Hardware													
1 BTT SKR 1.4 Turbo													
4 TMC5160 Stepper drivers													
1 BTT DCDC Power Module for SKR 1.4	<u> </u>	- VDD - 0.0 VD 2.0									-		
1 PT100 Pre-Amplifier (Ultimaker Style), 3 o			DIY)										
1 MOSFET Adapter Board to run Hotend Fa	n off of SERVO co	onnector (DIY)											
What will these Mods do?													
Enable flicker-free dimmable Case Lighting	g, using the origin	nal Ultimaker Case	LED-Strips										
enable PWM-controlled Parts Fan													
enable PWM-controlled 5VDC for use with													
increase Bed-Heater and Hotend-Heater P													
enable ulticontroller display and Clickwhe	el+LEDs (as publi	shed by Anthrix he	ere:)	nttps://communit	y. ui ti maker. com/	/ topi c/30/86-u	Itimaker-with-skr-14/
